The letters "m" and "n" are used for nasalization of vowels in Konkani. If the nasal vowel is in the middle of the word (eg. dant, kany, khøny), the letter "n" is used. If it is in the end of the word (eg. tem) the letter "m" is used. In front of the letters b, f, p, and n (eg. ambo, chamfo) the letter "m" is always used for nasalization.
